

## HULFT Business Intelligence

### A Managed Service

Dashboards are only as good as the data behind them. Count on HULFT to deliver clean and fresh data from any source, and create a Power BI visualization in as little as 30 Days.

**Put an end to data cleansing** and spend more time managing your operational performance.

**Go from 30% to 100% data access** with HULFT's enterprise-grade data integration capabilities.

**A dashboard that evolves monthly** through our change management service included in your subscription.

**Extreme data security** leveraging a proven enterprise architecture from HULFT and Microsoft.

**Cost is fraction of traditional BI** that is made possible through a SaaS model and a company with international scale.

#### A Managed Service

---

The majority of HULFT's customers do not have the staff or the budget to manage a large-scale BI platform, but they have urgent requirements to better understand and measure the performance of their business. HULFT unlocks your essential data that meets IT and regulatory compliance and serves it up in the dashboard format that your business team requires.

#### Legacy or Modern Data? No Problem.

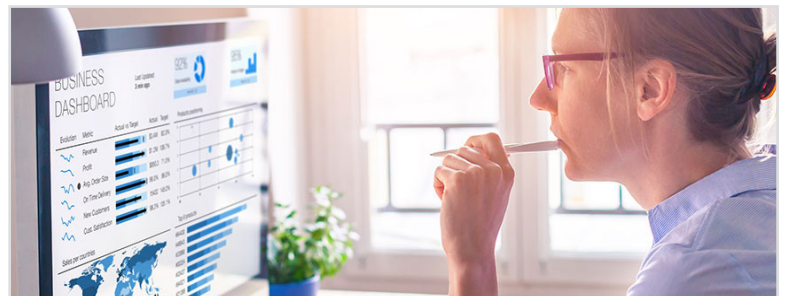

---

BI data comes from everywhere, in a wide variety of formats. Whether your source is an old legacy system or an IoT sensor stream in a factory, our library of more than [600 business adapters](#) can connect to practically any enterprise system or data source.

#### Leveraging Power BI

---

We use Power BI because it is the most widely used analytics tool that most business users already have some experience with, and most companies already have a license that enables them to use it immediately. This speeds up the time it takes to create the BI solution and reduces operational costs significantly.

## Features Overview and Pricing

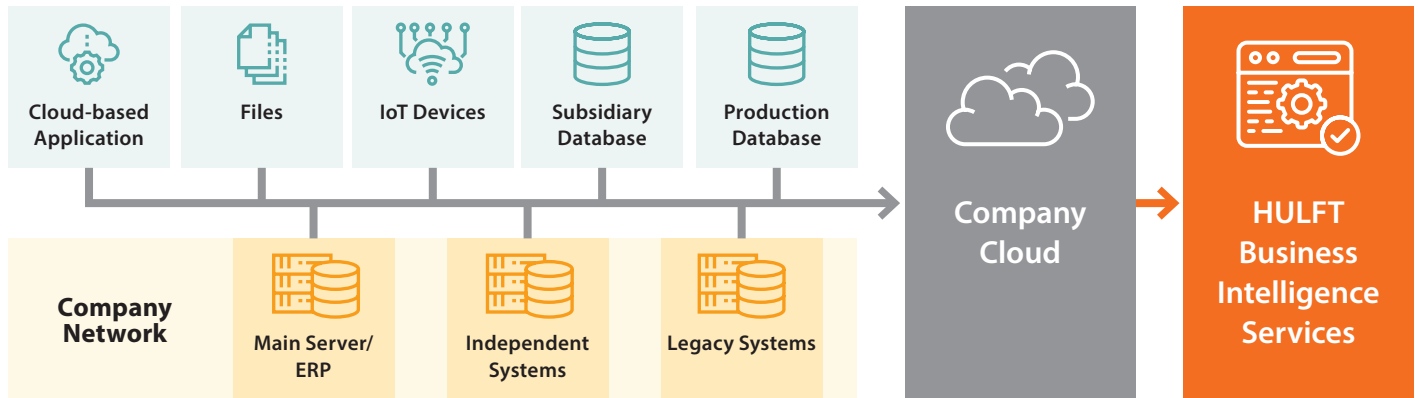

With the HULFT Business Intelligence service, you can select one of three pricing levels depending on your needs. No matter what, you receive simple and predictable billing.

With more than two decades of helping global companies solve the most complex data integration challenges, the HULFT Professional Services team leverages its best practices through engagements with line-of-business professionals and technical staff. We locate key data sources and transform them into a format that can be consumed by Power BI, and HULFT helps business leaders construct their custom KPI dashboards.

Data repository connections	1	2 – 3	4+
Complex data transformation and preparation			✓
<b>Performance Indicators (Metrics)</b>			
Industry standard metrics	Up to 5	Up to 10	Up to 15
Industry standard KPIs and data visualizations			✓

## A Proven Data Integration Platform

Underneath the data visualization layer is [HULFT Integrate](#), an automated, no-code data integration platform. Whereas most data extraction tools require significant manual interaction such as uploading the file, waiting for results, downloading the data, and then manipulating it to the right format, HULFT Integrate connects that data to any internal or external database directly. HULFT maintains a library of more than [600 business adapters](#) — just about any enterprise system or data source you can think of.

## Our Onboarding Process
