The HULFT EDI Service

We manage your EDI while you manage your customers

EDI is a technology that has endured many evolutions over many decades. While experts predicted its demise many times, it remains an important way to do business with key partners.

A Managed Service

Saison Technology offers highly scalable data integration and an EDI platform hosted in the cloud that enables limitless trading partners, users and   back-end data connections. We also offer a low-code, visual flow designer that connects your ERP, CRM, WMS, MES accounting and other major enterprise systems directly to your supply chain.

Cloud-based portal available 24/7/365

Do you need to check on a document or a purchase order? Don't pick up the phone; just go to your custom portal, which provides granular visibility into its status and the steps required to complete the transaction.

We're all about industry standards

We maintain a library of over 600 connectors built on document standards such as ACH, EANCOM, EDIFACT, GISB, HL7, IATA PADIS, TRADCOMS, X12, VDA, PDF Label and more.
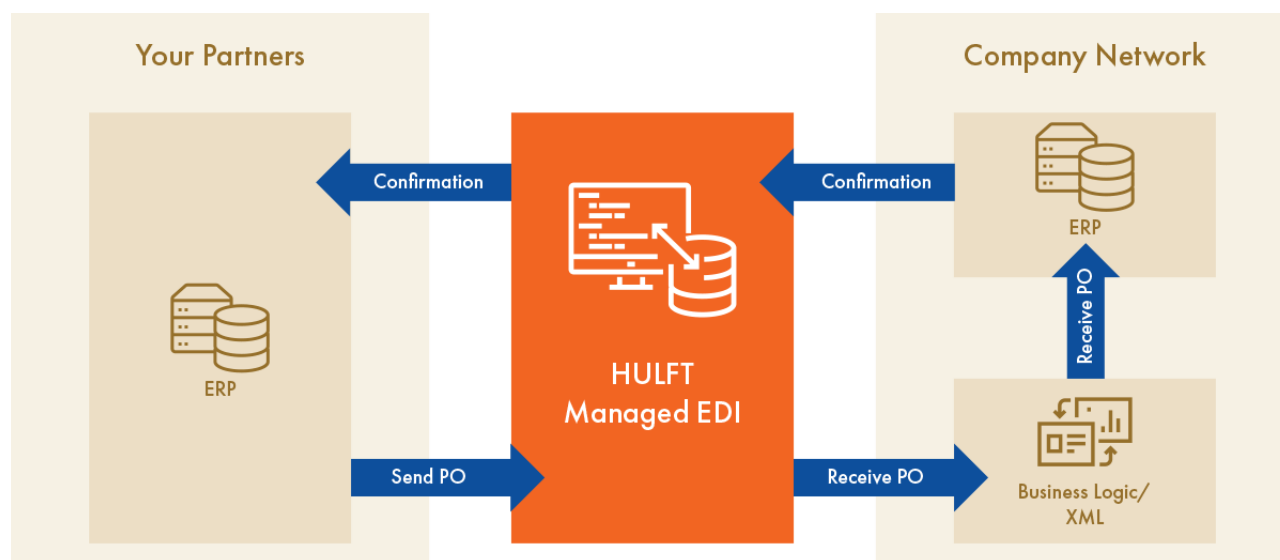

With HULFT EDI, you can:

- **Speed up business cycles** by 60% or more

- **Improve cash flow** and reduce order-to-cash cycles by 20%

- **Complete closed-loop transactions** with partners in minutes with no human intervention required

- **Automate application data** across your supply chain with limited coding

- **Dramatically reduced order processing** times, resulting in more accurate inventory reports and fewer stockouts

- **Create faster document processes** result in 80% less intervention and re-work by your staff
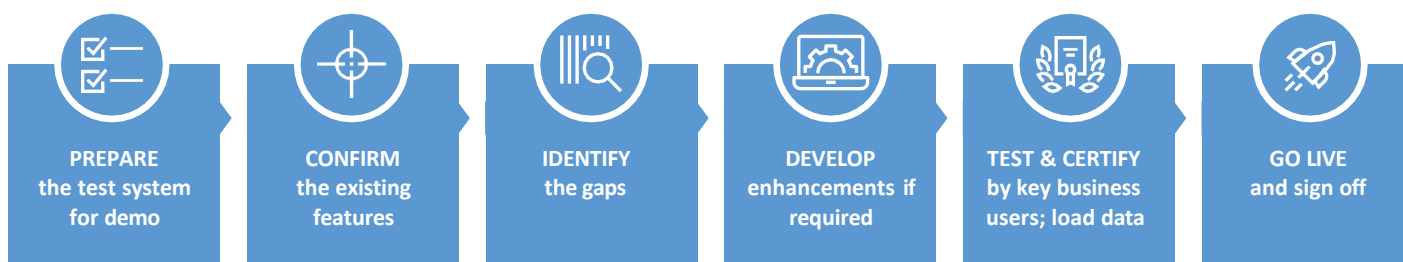

A Proven Data Integration Platform and EDI Process

Because there are so many standards and communications protocols, you need a trusted partner that not only understands the end-to-end process, and one that can make changes as your business evolves. Leave it to Saison Technology to map and maintain your EDI workflow so you can spend more time with customers, partners and other strategic areas of the business.

Implementation Methodology

With over 30 years of enterprise data integration experience, Saison Technology Professional Services has a proven methodology to work with businesses and IT teams to get projects off the ground fast and complete them in record time.
